**Bundled Products or Services (See Footnote 8)**

<b>There are other products or services bundled with the electricity price plan:</b>
No
<b>If yes, the electricity retailer should specify below what are the bundled products or services. You should discuss the details with the electricity retailer such as the applicable fees and charges as well as the terms and conditions for accepting the bundled products or services</b>
N.A.

## Footnotes

- 
1. You can visit the online information platform at <http://compare.openelectricitymarket.sg> to easily compare the standard price plans offered by different electricity retailers.  
  
Standard price plans refer to the following:
    - Discount off regulated tariff plan that charges you a rate that is based on a discount off the prevailing regulated tariff throughout your contract duration.
  2. The electricity retailer may offer you incentives in return for contracting for the electricity price plan. The incentives may include:
    - Free gifts, promotions, rewards or services; and/or
    - Conditional discount that reduces your electricity bill if you meet certain conditions such as making payment promptly or via certain payment modes.
  3. During the contract duration, the electricity retailer will charge you a fee for early termination of the contract or switching to buy electricity from another retailer or SP Group.
  4. A smart meter is a digital meter capable of measuring your electricity consumption every half-hour. It can also be read remotely and provide you with timely and useful information on your electricity consumption. It is optional to install a smart meter to measure your half-hourly electricity consumption, unless the price plan you sign up for requires one. Your retailer will advise you on this.
  5. Under indirect billing, you will receive a single monthly bill from SP Group covering the charges for electricity supply by the electricity retailer as well as the charges for other utilities (such as water and gas supply). With direct billing, the electricity retailer will bill you directly for electricity supply, and SP Group will issue you a separate bill for the other utilities.
  6. Electricity retailer requiring you to provide a security deposit should indicate the amount of security deposit for electricity supply. If you are a residential consumer, the maximum amount of security deposit an electricity retailer is allowed to collect is equivalent to 2 months of your average monthly electricity bill at the point of contracting, contract renewal or during the term of the contract.
  7. The electricity retailer may require you to pay one or more of the prevailing market-related charges. You may refer to <http://www.openelectricitymarket.sg> for more information on market-related charges.
  8. The electricity retailer may bundle the supply of electricity with other products and/or services, such as the provision of phone or internet services, home energy management systems, newspaper or magazine subscription, etc.
